 **Home** : Main Road Seri, Street 1 house no 3, 11200, kotli, Pakistan
 **Email**: asherzaki960@gmail.com  **Phone**: (+92) 3049111104  **Whatsapp Messenger**: +923049111104
Gender: Male **Date of birth**: 25/02/2004 **Place of birth**: Kotli AJK, Pakistan **Nationality**: Pakistani

ABOUT ME

Data Science graduate (CGPA 3.89/4.00, Gold Medalist) with hands-on experience across the full AI and data pipeline — from building LLM-powered web applications and RAG systems to delivering end-to-end data science projects for real clients. Founded XactGen, an AI and data science consultancy registered under SCO STP, and contributed as an AI Developer at Robx.AI, building production tools including sentiment analysis platforms and social media intelligence systems. Also completed a DevOps and Generative AI internship at Systems Limited. Comfortable working independently, delivering client projects, and shipping AI-integrated products. Seeking a data science or AI role within a European work environment.

WORK EXPERIENCE

XactGen

City: Kotli AJ&K | **Country**: Pakistan

[10/09/2025 – Current] **Founder & CEO**

- Founded and registered an AI and data science consultancy under the Software Technology Park (SCO STP), overseeing all business operations from client acquisition to project delivery.
- Lead end-to-end client engagements covering machine learning, data analysis, dashboard development, and custom AI solutions across multiple industry domains.
- Manage project scoping, technical execution, and delivery timelines independently, ensuring quality and client satisfaction across all engagements.
- Built the company's service offerings around practical AI consulting translating business problems into data-driven solutions for clients.

Robx.AI

City: Islamabad | **Country**: Pakistan

[25/11/2025 – Current] **AI Developer**

1. Developed LLM-powered web applications including a sentiment analysis platform (Pulisint) that fetches and processes data from multiple live sources using custom scraping pipelines.
2. Built Humint a web app that scrapes social media data and surfaces it through LLM-processed outputs using external APIs including Nadara, enabling structured intelligence display.
3. Contributed to I Am Scientist, building teacher-facing AI tools that support classroom workflows and content delivery within the platform.
4. Worked across the full AI stack: data scraping, prompt engineering, API integration, RAG pipelines, and LLM deployment in production web environments.

Systems Limited

City: Islamabad | **Country**: Pakistan

[01/06/2025 – 25/08/2025] **Intern – DevOps and Generative AI**

- Supported DevOps workflows including version control, CI/CD pipelines, and containerisation using Git and Docker in a production-grade environment.
- Contributed to AI chatbot development and the integration of machine learning and generative AI components into live applications.
- Worked within Linux-based environments and Azure cloud services to deploy and manage AI-related solutions.

Datix AI

City: Kotli AJK | **Country:** Pakistan

[10/07/2024 – 15/04/2026] **Freelance AI & Data Consultant**

- Delivered client-facing data science projects end-to-end covering requirements gathering, data cleaning, statistical analysis, modeling, and final dashboard or report delivery.
- Worked across tools including SPSS, R, Tableau, and Python to meet diverse client requirements across analytics and visualization.
- Handled projects spanning predictive modeling, exploratory data analysis, and business intelligence dashboards for clients across multiple countries.

Kaggle (Online Platform)

City: Islamabad | **Country:** Pakistan

[05/01/2023 – Current] **Independent Data Science Practitioner**

- Built and published data science projects covering classification, regression, and exploratory analysis on real-world datasets.
- Designed end-to-end ML pipelines from data cleaning and feature engineering through model training, evaluation, and visualisation.

EDUCATION AND TRAINING

[17/12/2021 – 21/12/2025] **Bachelor of Data Science**

University of Kotli Azad Jammu and Kashmir <https://uokajk.edu.pk/>

City: Kotli AJK | **Country:** Pakistan | **Field(s) of study:** Data Science | **Final grade:** CG PA: 3.89 / 4.00 | **Level in EQF:** EQF level 6 | **Thesis:** Smart Animated Tutor for Kids Using 3D Animation and Generative AI

- Data Science and Data Analysis
- Machine Learning and Deep Learning
- Generative AI and Large Language Models
- Statistical Analysis and Data Mining
- Data Visualization and Dashboarding
- Database Systems
- Python Programming for Data Science
- Model Evaluation and Performance Optimization
- Big Data Analytics
- Cloud Computing

[01/08/2019 – 30/06/2021] **Intermediate in Computer Science (ICS)**

Allama Iqbal Public School and College Seri, Kotli

City: Kotli | **Country:** Pakistan | **Field(s) of study:** Computer Science | **Level in EQF:** EQF level 4

LANGUAGE SKILLS

Mother tongue(s): Urdu

Other language(s):

English

LISTENING C1 READING C1 WRITING B2

SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

[14/12/2024 – 22/12/2025]

Smart Animated Tutor for Kids

(FYP) Thesis project. Designed a web-based intelligent tutoring system for children aged 3–6, combining generative AI, text-to-speech, and 3D animated avatars to teach alphabets, numbers, colours, and shapes. Included an AI poem generator, a digital drawing canvas, and a teacher dashboard for creating personalised avatars and managing learning content.

Link: <https://fyp-2-git-main-hashirs-projects-a6498d88.vercel.app/>

Telco Customer Churn Prediction

Built a predictive system to identify customers at risk of churning in a telecom dataset. Covered data cleaning, exploratory analysis, feature engineering, and classification model evaluation using standard performance metrics.

Data Analysis and Visualization Project

Conducted exploratory data analysis on multiple real-world datasets to uncover trends, patterns, and insights. Applied data preprocessing techniques and statistical analysis to ensure data consistency and reliability. Designed visual representations and dashboards to communicate findings clearly and support data-driven decision making. The project focused on transforming raw data into meaningful and interpretable visual insights.

Titanic Survival Prediction

Trained classification models on the Titanic dataset, handling missing values, engineering features, and evaluating model performance. A foundational project demonstrating structured data classification workflows.

Generative AI Chatbot

Built a context-aware conversational chatbot using large language models, focusing on prompt design, response flow, and user interaction quality. Explored practical LLM deployment for real-world query handling.

Keyboard Device Driver Development for Windows Operating Systems

Designed a basic Windows keyboard device driver as part of an Operating Systems course, handling keyboard input events and demonstrating low-level hardware-to-OS interaction and system-level programming concepts.

LLM Fine-Tuning & Web App Integration

Fine-tuned large language models for domain-specific tasks and integrated them into web-based applications via APIs. Covered the full pipeline from model adaptation through to production deployment within a live web environment.

Pulisint-Sentiment Analysis Dashboard

Developed a dynamic, web-based sentiment analysis platform that scrapes live data from multiple online sources and processes it through an LLM pipeline to surface structured sentiment insights on a real-time dashboard.

Humint-Social Media Intelligence Tool

Built a data intelligence web app that collects public profile data from multiple social media platforms and external sources, processes it through LLM-driven pipelines, and presents structured outputs via API integrations including the Nadara platform.

NYC Taxi Fare Prediction with PySpark

Applied distributed machine learning using PySpark on the NYC Taxi Fare dataset. Built a regression pipeline at scale, demonstrating practical use of Apache Spark for big data modelling and prediction tasks.

Pakistan Sentiment Analysis Dashboard

Built a dynamic, web-based dashboard performing sentiment analysis on Pakistan-focused data sources. Enabled real-time filtering, trend tracking, and visual sentiment breakdowns through an interactive interface.

Data Analysis & Visualisation Portfolio

Conducted exploratory data analysis across multiple real-world datasets, applying preprocessing, statistical techniques, and visualisation to communicate patterns and support data-driven decisions.

Virtual Try Room-Browser Extension

Built a web browser extension allowing users to upload a garment image and a personal photo to virtually try on clothing using AI-based image processing. Developed end-to-end for a client under XactGen.

MS Access Database System (Client)

Designed and built a structured relational database in Microsoft Access for a client, covering schema design, data entry forms, queries, and reporting to meet their specific data management requirements.

CERTIFICATIONS

[Coursera, 2022]

Google Data Analytics

Data analysis, data cleaning, spreadsheets, SQL, and data-driven decision making

Mode of learning: Online

[CourseraCoursera, 2022]

Data Visualization with Tableau

Interactive dashboards, data visualization principles, and storytelling with data

Mode of learning: Online

[Coursera, 2023]

Data Analysis and Visualization in Power BI

Data modeling, DAX basics, and dashboard development using Power BI

Mode of learning: Online

- [Coursera, 2023] **Introduction to Big Data with Hadoop and Spark**
Big data concepts, distributed computing, Hadoop ecosystem, and Apache Spark

Mode of learning: Online

Statistical Analysis & Visualisation (Client)

Delivered a complete statistical analysis and visualisation project for a client using R and SPSS for data processing and hypothesis testing, with Tableau used to present findings through interactive dashboards and reports.

SKILLS

AI & Machine Learning

Deep learning | NLP | Model training & evaluation | Prompt engineering | Machine learning | Generative AI | LLMs

Data Science & Analysis

Data cleaning | Data Exploration | Feature engineering | Statistical analysis | Predictive modelling | Big data analytics | Data-set Creation (Scraping, python script Data Labelling)

Programming & Libraries

R | python | SQL | Matplotlib | Scikit-learn | Keras | Exploratory data analysis | NumPy | React | Flask | NextJS | Plotly | Pandas | Fast API | Seaborn

Data Visualisation & BI

Power BI | Tableau | Excel | Google Sheets

Tools & Infrastructure

Linux | RestAPIs | Web Scraping | SQL Lite | Azure AI | Git & GitHub | Azure DevOps | MonogDB

DRIVING LICENCE

Motorbikes: A2 18/09/2023 – 17/09/2028

HONOURS AND AWARDS

[2025] Gold Medalist – Bachelor of Data Science Awarding institution: UOK

Awarded the Gold Medal for achieving the highest academic standing in the Bachelor of Data Science program, with a CGPA of 3.89/4.00.

CONFERENCES AND SEM-INARS

Empowering Research with Artificial Intelligence University of Kotli Azad Jammu and Kashmir

Participated in a research-focused workshop exploring the use of artificial intelligence tools to enhance academic research, including literature review, data analysis, and research productivity.

Smart Research Workshop NCAI

National University of Sciences and Technology (NUST), Islamabad

Attended a hands-on workshop organized by NUST focusing on smart research practices, modern research tools, and the application of AI technologies to support high-quality academic and technical research.
